

We're Smiling Behind Our Masks

Dr. Kassab

Meet OSOC

During these strange times, we have been looking to serve our patients in a number of new ways while still maintaining social distancing and safety precautions. While you may not see all of us, our team members are here to help! Each week we will be highlighting a different section of the staff to put names with the people behind the masks.

Dr. Kassab is currently Chief of Surgery at St. Joe's hospital. He completed a fellowship at University of California-San Diego, making him one of the few orthopedic surgeons in the Detroit area specially trained in hip and knee replacement and reproduction surgery. In his spare time, he enjoys fishing and reading WW2 biographies. He and Dr. Bahu have recently adopted sibling labradoodles.

(Left to Right: Dr. Kassab, Alex, Angie, Gerald Thomas)

Gerald Thomas: Jerry has been working with Dr. Kassab since 2003. You will meet with him when consulting for your surgery as well as at your pre and postoperative visits. Jerry makes sure that everything is on track for your upcoming joint replacement procedure. He is also able to see you for non-operative concerns such as injections to help address your hip/knee pain. Jerry loves Golf, BBQ and all things Hockey.

Alex joined the OSOC team in 2019. You may have seen her smiling face at the front desk. She recently stepped up to the challenge of surgery scheduling for Dr. Kassab and Dr. Bahu and works hard to make sure your surgery process is as smooth as possible. Alex is the proud owner of a Bearded lizard named Venkman and has 2 children. She also enjoys cross stitching in her spare time.

Angie: Angie has been a medical assistant with us since 2019. She will be there to greet you the moment you step into our office. She loves being outdoors and owns a "Gentlewoman's Farm" where she raises bees, chickens and goats. She also enjoys making popcorn and strategy boardgames.
